

CROWN & BRIDGE

HIGH-QUALITY
SOLUTIONS FOR
DAMAGED OR
MISSING TEETH

WHY ARE CROWN & BRIDGE NEEDED?

Teeth that are decayed, broken, cracked or missing impact your ability to eat, speak and smile with confidence. Dental crowns and bridges are highly cosmetic restorations that restore form and function to the smile after damage or tooth loss. Made of high-quality cosmetic materials, crowns and bridges are custom crafted to meet your unique oral health needs and smile goals. Seamlessly blending with surrounding teeth, these restorations appear to rise from the gum line for a confident, lasting smile.

CREATING LIFELONG SMILES

COVER AND PROTECT TEETH WITH DENTAL CROWNS

Dental crowns are created to cover and protect damaged teeth. These single restorations return biting and chewing ability and natural-looking esthetics to your smile. Crowns are custom made to fit over prepared teeth and are permanently affixed to your tooth structure or dental implant posts.

DREAM SMILE WITH QUALITY CARE

As a leading general and cosmetic dentist, Dr. Patel uses modern technology to assist in making impressions for crowns, bridges, veneers, clear aligners, and other devices. Dr. Patel trades goopy impressions for 3D images, which takes seconds and offers a more comfortable experience for patients. The actual crown and bridge procedures are also comfortable, generating natural-looking results. We are excited to help you achieve your best smile yet!
