## WHEN DENTAL IMPLANT IS NEEDED

When it comes to replacing missing teeth, you may have several options. However, none offers the superior benefits to your oral health and smile of dental implants. The gold standard in tooth replacement today, dental implants permanently replace missing teeth and offer a life-changing solution to the challenges of tooth loss. Dental implants are placed within the jawbone. They replace the root and crown portions of teeth, rivaling the natural look, feel and function of natural tooth structure. Dr. Patel has extensive experience in placing and restoring dental implants and is the dentist so many in the community turn to for the highest standard of care.

## OUR DENTAL IMPLANT PROCESS

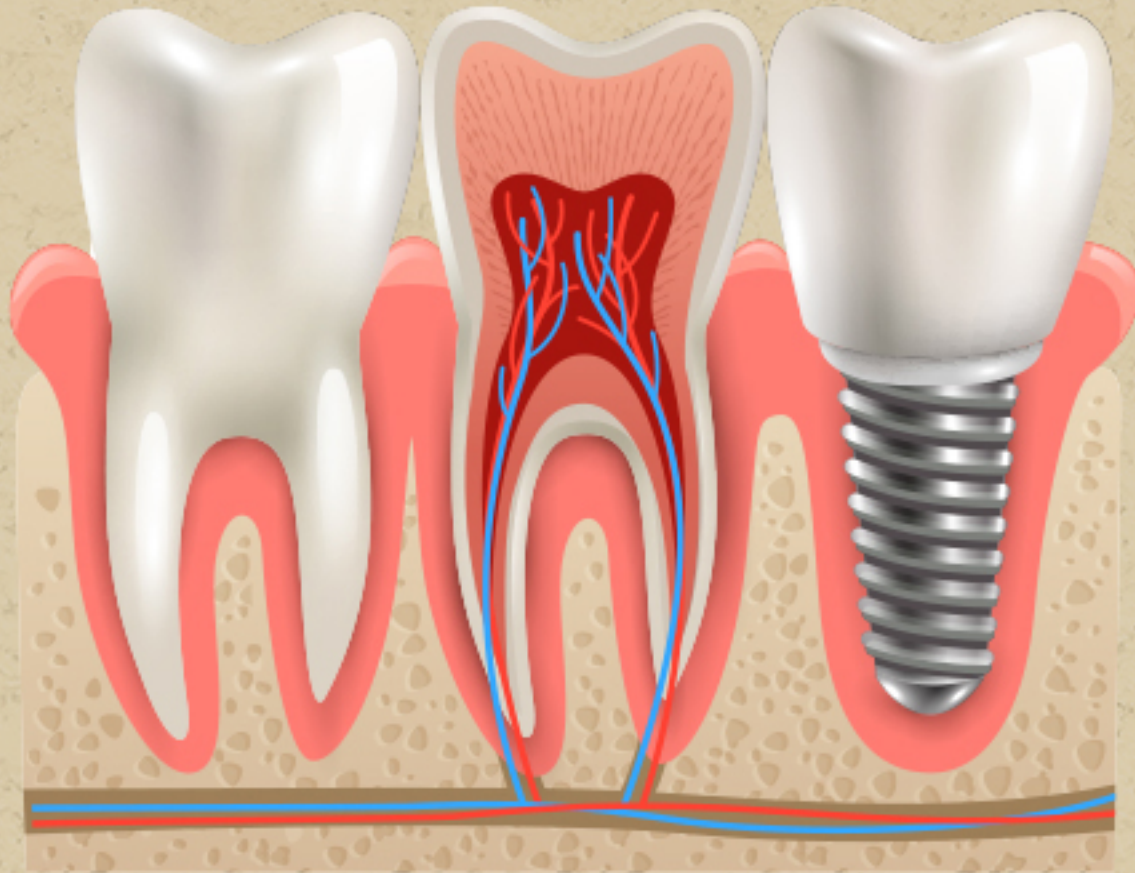

With dental implant technology, we can completely customize your implant treatment to meet your unique tooth replacement needs. Our implant process begins with a personalized consultation, which allows Dr. Patel to discuss your questions and overall goals. We then use our 3D cone beam digital imaging technology to take comprehensive, detailed x-rays of your mouth, which helps us ensure we are placing your dental implants in the most precise position. On the day of your dental implant procedure, we ensure your comfort through sedation dentistry and Anesthesia services. Our guided implant surgery techniques allow for precision placement of your dental implants within the jawbone, and predictable results for your tooth replacement.

## CONVENIENT, COMPREHENSIVE, QUALITY CARE

As your general dentist, Dr. Patel has a broad range of experience in understanding and treating comprehensive oral health needs. Most general dentists only restore dental implants and refer out for implant placement. With advanced training in both dental implant surgery and restoration, Dr. Patel has refined skills in both placing and restoring dental implants. He can complete your entire implant procedure from the comfort of our state-of-the-art facility. This provides you the ultimate in convenience and saves you from visiting multiple offices for your care. Whether you need single or full-arch implants, Dr. Patel provides the advanced expertise to restore health, confidence and beauty to your smile.

“Dr. Patel and his team are amazing! They’re professional, considerate and make you feel at ease. I had a implant done a few years and now returning for two more. As much as I hate dental work, I’m at ease returning to Dr. Patel and his team. After my consultation I left with a lot of information, answered questions and excitement to fix my smile again.

There’s no one I trust more for my dental work!”
