WHY SOME TEETH NEED ROOT CANAL TREATMENT

Teeth with decay or cracks that reach the center, or pulp, of the tooth often require root canal treatment to be saved. When damage to this tooth structure occurs, bacteria invade the pulp, causing infection within the tooth that often travels to the underlying bone. A root canal is a type of endodontic treatment that allows Smyl Manatee's Doctors to remove internal damage and infection, restoring and strengthening the tooth. A root canal can often save your smile from extraction and further oral health concerns. Historically, root canals have been perceived as uncomfortable and lengthy procedures. With our advanced technique and compassionate approach, however, undergoing root canal therapy is a comfortable, convenient, positive experience!

SYMPTOMS OF INFECTED TEETH

Any sign or symptom of an infected tooth should be evaluated promptly and here are some of the symptoms you can experience.

- ✓ Tooth pain
- ✓ Gum or facial swelling
- ✓ Dull, persistent toothache
- ✓ Pain when biting
- ✓ Pimple-like area on gum tissue
- ✓ Sensitivity

THE ROOT CANAL PROCESS

Our Doctors at Smyl Manatee are highly experienced in providing comfortable root canal treatment, from the convenience of our state-of-the-art facility. We ensure your comfort throughout the procedure by using the computer-assisted anesthesia, and sedation dentistry services if added relaxation is needed to perform a root canal, Our Dentists thoroughly cleanses bacteria and necrotic tissue from within the tooth and then fill the internal portions of the roots and tooth with a special material, which strengthens the tooth structure. Once the tooth is healed, a custom dental crown is placed to cover and protect the tooth, restoring full function and appearance

CREATING LIFELONG SMILES

"I was always scared of going to the dentist until I met Dr Patel. He explained me during the initial consultation that I would need root canal in order to protect my teeth. Which scare me initially but then he introduced me to sedation dentistry. Through sedation I was able to get procedure done without feeling any pain. High Quality of Work with amazing technology "
